

Business Questions Document

Project Title

Employee Attrition Analysis & Retention Intelligence System

Purpose

The purpose of this document is to define the key business questions that need to be answered through data analysis. These questions will help identify the factors responsible for employee attrition and support the development of effective employee retention strategies.

The insights generated from these questions will guide the SQL analysis, dashboard development, predictive modeling, and final business recommendations.

1. Attrition Overview

The first objective is to understand the overall attrition situation within the organization.

Business Questions

1. What is the overall employee attrition rate?
2. How many employees have left the organization?
3. How many employees are currently retained?
4. Is employee attrition a significant business concern?
5. What percentage of the workforce has left the company?

2. Department Analysis

The objective is to identify departments that experience higher employee turnover.

Business Questions

6. Which department has the highest attrition rate?
7. Which department has the lowest attrition rate?
8. Are certain departments more affected by attrition than others?
9. What percentage of attrition comes from each department?
10. Which department should be prioritized for retention initiatives?

3. Job Role Analysis

The objective is to understand how attrition varies across different job roles.

Business Questions

11. Which job roles experience the highest attrition?
12. Which job roles have the lowest attrition?
13. Are employees in specific job roles more likely to leave?
14. Which roles contribute most to overall employee turnover?
15. Do entry-level roles experience higher attrition than senior roles?

4. Employee Demographics Analysis

The objective is to determine whether demographic factors influence employee attrition.

Business Questions

16. Which age group experiences the highest attrition?
17. Which age group has the lowest attrition?
18. Does gender influence employee attrition?
19. Does marital status affect employee retention?
20. Are younger employees more likely to leave the organization?
21. Are experienced employees more likely to stay?

5. Compensation Analysis

The objective is to understand the relationship between employee compensation and attrition.

Business Questions

22. Does salary influence employee attrition?
23. What is the average income of employees who left the company?
24. What is the average income of employees who stayed?
25. Are lower-paid employees more likely to resign?
26. Which salary range experiences the highest attrition?

6. Work Environment Analysis

The objective is to evaluate how workplace conditions affect employee retention.

Business Questions

- 27. Does overtime contribute to employee attrition?
- 28. Are employees who work overtime more likely to leave?
- 29. Does job satisfaction influence attrition?
- 30. Does work-life balance affect employee retention?
- 31. Does environment satisfaction impact employee turnover?
- 32. Which workplace factors are most strongly associated with attrition?

7. Experience and Career Growth Analysis

The objective is to understand how employee experience and career progression affect retention.

Business Questions

- 33. Are new employees more likely to leave the company?
- 34. How does total work experience impact attrition?
- 35. Does the number of years at the company affect retention?
- 36. Does promotion frequency influence employee attrition?
- 37. Are employees who have not received promotions more likely to leave?
- 38. Does career growth play a role in employee retention?

8. Performance Analysis

The objective is to evaluate whether employee performance is related to attrition.

Business Questions

- 39. Is there a relationship between performance ratings and attrition?
- 40. Are high-performing employees leaving the organization?
- 41. Are low-performing employees more likely to leave?
- 42. Does job involvement affect employee retention?

9. Employee Risk Identification

The objective is to identify employees who may be at risk of leaving.

Business Questions

- 43. What factors contribute most to employee attrition?
- 44. Which employee characteristics indicate a higher risk of leaving?
- 45. Can employee attrition be predicted using historical data?

- 46. Which variables should be considered when identifying at-risk employees?
- 47. How can HR proactively address attrition risks?

10. Strategic Business Questions

The objective is to generate actionable insights for management.

Business Questions

- 48. What are the top reasons behind employee attrition?
- 49. Which employee groups should HR focus on retaining?
- 50. What retention strategies can help reduce attrition?
- 51. Which business areas require immediate attention?
- 52. How can management improve employee satisfaction and retention?
- 53. What actions can be taken to reduce future attrition?

Expected Outcome

By answering the above business questions, the organization will gain a clear understanding of employee attrition patterns and the factors influencing employee turnover. These insights will support data-driven decision-making, improve workforce planning, and help develop effective employee retention strategies.
